

AS200i HDPE

Odor Filter/Emission Filter

Clear solutions for odor and emission problems

The standard solution of Aspatec holland B.V. To remove odor emission and airborne particles at emission emissions. Aspatec holland strives to contribute to a clean / fresh living environment and a sustainable / green world. With our products and services (advice, service and maintenance) we want to enable customers to safely and efficiently purify air and water, thus preventing damage to people, the environment and materials as much as possible. Our specialization is to offer high-quality, skillful solutions, where the toughest requirements for air purification are set.

This series of filters are self-breathable, or forced by means of a fan at very low pressure and can be performed with multiple combinations of filter media. Depending on application or emission vapor.

Material: HDPE black

Applications

Industry Emission

Heavily loaded sewage pumping stations etc. Emission of oil tank companies

Emission of GFT processors

Refuse collectors

Fish processors

Food sector

Paper mills

Venting for sewage pumping stations

Vacuum sewage technology

Ventilation of cellars / rooms / halls / silos

Other forms of emission treatment through this filter is also possible

Optional

Forced aeration / venting by means of a fan (instead of self-breathing / atmospheric)

Filter content; bulk filling

See below for technical specifications and dimensions.

Description	Filter Capacity	Filtermedium	Air flow	Dimensions mm	Connection
AS200i HDPE-1000L 1000	1000 liter media	As specification	2000M3 / hour	O1000xH1500	variable
AS200i HDPE-2000L 2000	2000 liter media	As specification	3600M3 / hour	O1500xH1800	variable
AS200i HDPE-4000L 4000	4000 liter media	As specification	6400M3 / hour	O1800xH2700	variable
AS200i special on request					

Other models or sizes are also possible

The dimensions and air capacities are indicative and dependent on emission vapor
